The initial documentation of a patient’s valuables and belongings is done in the Admission History assessment. A section marked ‘Valuables/Belongings’ is present in the Adult, Pediatric and OB assessment.

Subsequent charting of patient valuables and belongings should be done via the Discharge Process mPage.

1. Click on the down arrow next to Valuables and Belongings
2. Click on the words Valuables/Belongings that pop up
3. This will bring up the Valuables/Belongings form where you can chart additional information.

*** The ad hoc form Valuables/Belongings is also still available.
